

Specialty: **Purchase engineering**

Services for the purchasing of system components

Are you buying the best-suited system components at the best price?

Do you need budget prices for your investment or engineering studies?

**Pumps, compressors, fans, heat exchangers, filters, ...
Piping, fittings, process control equipment, tanks, insulation, steel construction, platforms, ...
Cranes, hoists, transport systems, ...
Process equipment and other system components**

We give you a way to streamline your purchasing process – to save time, to efficiently select the best suppliers, to get the best prices – in short, to save money.

Our services for purchasing system components can include:

- Technical and commercial specifications, definition of required quantities
- Preparation of tendering (bidding) documents
- Listing suitable suppliers, with recommendations
- Obtaining offers from suppliers and discussing the offers with them
- Technical and commercial comparisons of offers (price comparison list)
- Evaluation of the offers; recommendations
- Preliminary negotiations with short-listed candidates, until order is placed
- Technical and commercial support during final contract negotiations

Our well-informed engineers have been working in the paper industry for over 20 years. Through their many projects they know all the leading suppliers in the industry. At the same time, we keep up with the market in order to find new suitable suppliers.
