

Services

p+p project provides services in all areas of the pulp and paper industry, the food and beverage industry, including converting and auxiliary systems.

We provide the following assistance for new plant projects, rebuilds, refurbishments, and extensions:

- **Studies**
Definition of the appropriate technology, technical solution, and plant capacity
- **Pre-project**
Fundamental data essential for the approval and financing of the project
- **Basic engineering**
Basic planning data after the project has been approved
- **Detail engineering**
Detailed planning data required for the realization phase of the project
- **Purchase engineering**
Technical specifications, invitation for tenders, evaluation of tenders for the main equipment and all other system elements
- **Erection planning**
Erection schedule, invitation for tenders for erection work
- **Erection and commissioning**
Erection supervision and coordination, commissioning engineering, start-up assistance
- **Project management**
Project scheduling and project management on site
- **Plant optimisation**
